Dry Ice
solutions

The highest quality dry ice, delivered right to you . . . at the best price!

Cold Jet's dry ice products are optimized for all industrial and commercial dry ice blast cleaning applications as well as food freezing, shipping, and many other uses. Dry ice quality impacts the performance of your blast cleaning systems and only Cold Jet's patented technology produces high-quality, high-density dry ice to ensure optimum results. The increased mass of our pellets improves blasting aggression and makes the pellets more effective. Stringent manufacturing standards ensure that you receive only the highest-quality dry ice products.

Cold Jet's dry ice services offer:

- High density pellets (in a variety of sizes)
- Nuggets (in a variety of sizes)
- Block

Service Program

Trained technicians can recommend the dry ice media that will maximize performance for your application.

- 48-hour delivery ensures fresh ice.
- Delivery schedules work with holiday and plant shutdowns.
- Delivery coincides with the installation of new Cold Jet blast systems.
- Job logistics provided for contractors.
